Sandeep Midde

Technology & Delivery Leader | Finance Platform Modernization | Applied AI

+919701255531 | sandeepmidde@gmail.com | linkedin.com/in/sandeepmidde/ | Hyderabad | sandeepmidde.com

SUMMARY

- **Technology & Engineering Transformation Leader** with 20 years of experience driving enterprise platform modernization, engineering delivery and technology strategy across regulated banking environments. As VP at Wells Fargo, led a 15-member engineering team responsible for Finance platforms supporting a $2.5T+ AUM business, delivering strategic modernization, architecture governance and operational improvements.
- Experienced in enterprise architecture, build-vs-buy decisions, stakeholder management and large-scale transformation, including a 70% reduction in projected TCO and 99.8% platform availability. Combines deep enterprise technology leadership with hands-on Applied AI experience spanning GenAI, RAG, agentic AI and intelligent automation.

SKILLS

Technical, Leadership & Transformation

Engineering Leadership & People Management | Technology Strategy & Roadmaps | Enterprise Architecture (TOGAF) | Platform Modernization | Program & Delivery Governance | Executive Stakeholder Management | Risk & Compliance & Audit Readiness (COSO / CMMI Level 5)

Engineering & Platform Delivery

Finance & ERP Platforms (PeopleSoft / Oracle) | CI/CD & Release Management | Cloud Platforms (Azure / AWS) | Python | API & Enterprise Integration (REST / Apigee) | Production Operations & Resilience | SOA & Event-Driven Architecture (Kafka)

AI / GenAI Engineering

Generative AI & LLM Applications | RAG & Vector Retrieval (ChromaDB) | Agentic AI & Workflow Automation | Prompt Engineering & Responsible AI | AI Evaluation & Guardrails | Multi-Model LLM Orchestration | AI Frameworks (LangChain / LangGraph)

WORK EXPERIENCE

Principal AI Product Manager

Jul 2026 - Present

Independently developed and deployed multiple GenAI applications, spanning conversational AI, knowledge management and agentic workflow automation, with hands-on ownership of product design, cloud-native architecture and implementation.

- Built Krishna Uvaca, a **RAG-based conversational AI platform** with grounded responses, multi-turn memory, and vector retrieval using LLM orchestration. [krsna.sandeepmidde.com]
- Built ObserverPrime, an intelligent automation platform running **agentic workflow automation system** and multi stage content pipelines with provider agnostic LLM integration, resumable background jobs, and automated test coverage.
- Architected Elara, an **AI knowledge management platform** that turns unstructured content into structured, searchable knowledge through automated ingestion, extraction, and retrieval pipelines. [elara.sandeepmidde.com]
- Architected and deployed AutoPilot, a live **multi-model AI job assistant** integrating predictive matching models and advanced ATS analytics, securing production reliability via a 337 test suite. [autopilot.sandeepmidde.com]

Vice President

Oct 2012 - Jun 2026

Wells Fargo India Pvt ltd

- Led a 15-member engineering team responsible for **strategy, platform, data governance, and delivery** of Finance FP&A platforms supporting a $2.5T+ AUM business, shaping technology roadmaps and target-state architecture.
- Directed a Retrieval-Augmented Generation (RAG) feasibility study to shape the **AI adoption roadmap**, building an evaluation harness with no-answer detection, achieving ~80% source grounded responses to de-risk engineering strategic goals and drive the production go/no-go decision.
- Drove a strategic **Finance platform modernization initiative**, evaluating build-vs-buy options for legacy ERP replacement and aligning Finance, business and technology stakeholders on the target-state solution, securing CTO sponsorship and reduced projected total cost of ownership by 70% ($4M to $1.2M).
- Redesigned the **delivery operating model** into module-aligned teams with clear accountability, standardized governance and performance measures, accelerated release frequency from monthly to biweekly and reduced deployment incidents by 20%.
- Strengthened Finance platform **operational excellence** through standardized service governance, SLAs, escalation frameworks and continuous improvement reviews; reduced Mean Time to Resolution (MTTR) by up to 60% and improved platform availability from 99.2% to 99.8%.

- Scaled **disaster recovery** testing from annual to semi-annual, coordinating parallel server failovers across 8 teams and reducing Enterprise Performance Management (EPM) system RTO to under 4 hours.
- Architected a COSO-aligned, audit ready **data retention framework** enforcing Fed and bank mandated compliance procedures by data classification, implementing automated file receipt validation and zero trust access controls.
- Optimized **IFRS-based General Ledger** allocation processes supporting cost-center P&L reporting by eliminating unnecessary reprocessing and improving workflow efficiency; reduced processing time by 58% (3.5 to 1.5 hours).
- Transformed a critical Finance **data-processing workflow** integrating upstream data with PeopleSoft, redesigning computation and integration architecture to reduce processing time from 3 hours to under 2 minutes.
- Architected an extensible **enterprise data infrastructure** leveraging the Bloomberg BEAP API to decommission a third party intermediary, cutting data latency by 99% and establishing a scalable blueprint for multi-system ingestion

Staff Consultant
Aug 2011 - Sep 2012

Oracle India Pvt ltd

- Drove **requirements discovery** through cross-functional stakeholders for the Talent Acquisition Model, translating business needs into scalable enhancements that improved system performance by 20% and stabilized workflows.
- Delivered **multilingual** support for Inspira, the United Nations' talent acquisition platform, enabling regional configurability and compliance for rollout across 190+ countries.

Technology Architect
Jul 2006 - Jul 2011

Infosys

- Managed **cross-functional delivery** and end-to-end SDLC for the Charles Schwab account, maintaining direct client-side communication to enforce a structured delivery discipline across design, upgrade, and support engagements.
- Led Finance digital transformation delivery across **Procure-to-Pay (P2P), Order-to-Cash (O2C) and Record-to-Report (R2R)**, covering General Ledger, Accounts Payable, Accounts Receivable, Asset Management and Purchasing, coordinated the upgrade of 900+ custom objects through implementation, deployment and hypercare.
- Owned **delivery governance** for recurring production incidents under strict SDLC and CMMI Level 5 standards, driving root-cause fixes that cut ticket backlog by up to 40% during financial-close cycles.
- Chaired the **LOB Communication Group**, uniting 30+ distributed teams through structured knowledge-sharing frameworks to drive innovation, engineering alignment and organizational best practices.
- Revived a stalled **Finance transformation program** at Dow Jones by analyzing undocumented legacy Finance workflows, resolving critical delivery dependencies and completing outstanding transformation deliverables to unlock the next phase of project funding.

CERTIFICATION

PMP - Project Management Professional

AI Security and Governance - Securiti

Salesforce Agentblazer Champion 2026

Oracle Certified PeopleSoft Technical Consultant

Microsoft Azure AZ-900: Fundamentals

Enterprise Product Management Fundamentals - Microsoft

EDUCATION

Post Graduate - Artificial Intelligence and Machine Learning (AI/ML) - IIIT Bangalore

MBA - IT, Financial Accounting - ICFAI

B. Pharmacy (Hons.) - BITS-Pilani, Rajasthan
